

Canvas: Manage Notifications

Samantha Starr - 2025-03-24 - OwlMed and Canvas

How do I manage my Canvas notification settings?

Open Notifications

In Global Navigation, click the **Account** link [1], then click the **Notifications** link [2].

View Account Notification Settings

The screenshot shows the 'Notification Settings' page. At the top, there are two informational banners. The first banner (callout 1) states: 'Account-level notifications apply to all courses. Notifications for individual courses can be changed within each course and will override these notifications.' The second banner (callout 2) states: 'Daily notifications will be delivered around 6pm. Weekly notifications will be delivered Saturday between 3am and 5am.' Both banners have a close icon (callout 3) in the top right corner. Below the banners is a 'Settings for' section (callout 4) with a dropdown menu currently set to 'Account'. At the bottom is a table (callout 5) titled 'Course Activities' with columns for 'Email' and 'Push Notification'. The table has two rows: 'Due Date' and 'Grading Policies'. The 'Due Date' row shows an email icon, a bell icon, and a green bell icon. The 'Grading Policies' row shows a calendar icon, a bell icon, and a greyed-out bell icon.

Course Activities	Email	Email	Push Notification
Due Date	emilyboone@instruct...	emily.boone.canvas...	For All Devices
Grading Policies			

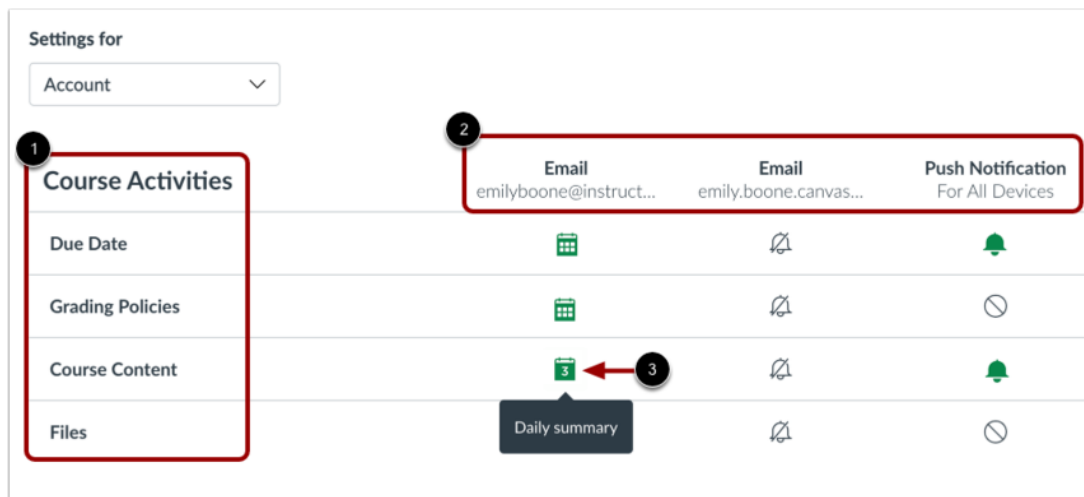

On the Notification Settings page, you can manage how you receive notifications for your Canvas account and/or [manage how you receive notifications for individual courses](#).

A banner describes the settings you are managing [1]. Another banner indicates the times when daily and weekly notifications will be delivered [2]. To dismiss a banner message, click the **Close** icon [3].

By default, the **Settings for** drop-down menu displays the **Account** option [4]. Account-level notification settings apply to all of your Canvas courses, however, any [course-specific notification settings](#) override account notification settings.

You can view your current account-level settings [5].

View Notification Types and Methods

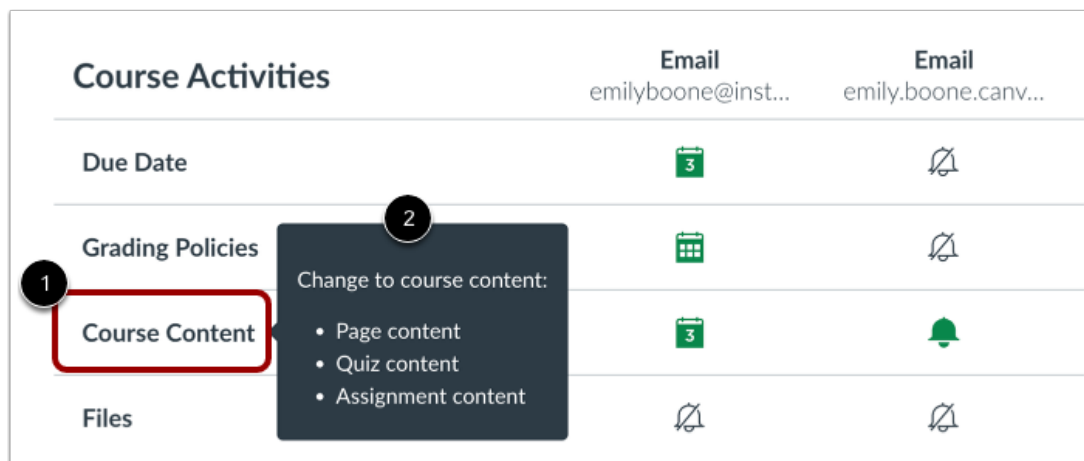

Account-level notification types are listed by category [1]. There are notifications for course activities, discussions, conversations, groups, scheduling, and conferences.

You can also view your contact methods such as email addresses and push notifications for mobile devices [2].

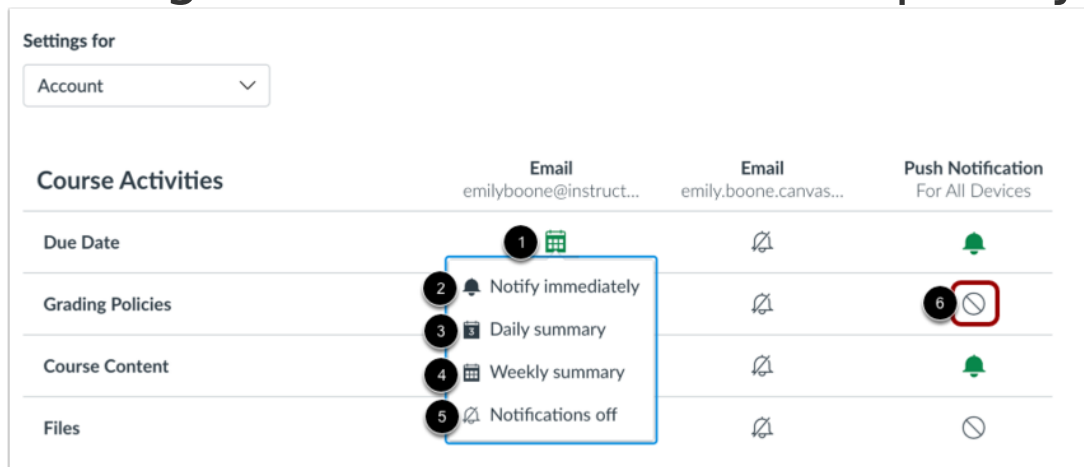

Each notification has a default delivery frequency setting. To view the current notification delivery frequency for a notification type and contact method, hover over the notification icon [3].

View Notification Details

To view details for a notification, hover the cursor over the notification name [1]. View details such as the activities that trigger the notification [2].

Manage Email Notification Frequency

Each notification is set to a default setting. To change a notification for a contact method, locate the notification and click the icon for the contact method [1].

To receive a notification right away, select the **Notify immediately** option [2]. These notifications may be delayed by up to one hour in case an instructor makes additional changes, which prevents you from being spammed by multiple notifications in a short amount of time.

To receive a daily notification, select the **Daily summary** option [3]. The date and time of your daily notifications are posted in a banner at the top of the Notification Settings page.

To receive a weekly notification, select the **Weekly summary** option [4]. The date and time of your weekly notifications are posted in a banner at the top of the Notification Settings page.

If you do not want to receive a notification, select the **Notifications off** option [5].

Unsupported notification types display the **Unsupported** icon [6]. You cannot manage unsupported notifications.

Notes:

- Each set notification setting automatically applies to all of your

courses. However, if you manage notification settings for a single course, notifications for that course must continue to be managed in the course.

- Although unregistered contact methods display in notification settings, they will not receive notifications until you confirm the registration.

Set Push Notifications

Course Activities	Email emilyboone@inst...	Email emily.boone.canv...	Push Notification For All Devices	Slack emily.boone.canv...
Due Date				
Grading Policies				
Course Content				
Files				
Announcement				

If you have enabled push notifications in the Canvas Student mobile app [on an Android device](#) or [on an iOS device](#), you can manage your settings in the **Push Notification** column.

Push notifications can only be sent to your mobile device right away or not at all. Daily and weekly notification options are not supported.

Some categories include limited availability for push notifications. For full details about supported notifications for push notifications, refer to the [Canvas Notifications resource document](#).
