

Map network shared drive

Brian - 2023-03-03 - Network and Connectivity

To map a network shared drive, please follow the examples below:

- Open File Explorer then right click on This PC in the left panel and select Map

network drive.

- Copy and Paste or type in the share location of the network drive you are mapping, remember to include the two \ symbols at the beginning of the name.

← Map Network Drive

What network folder would you like to map?

Specify the drive letter for the connection and the folder that you want to connect to:

Drive:

Folder:

Example: \\server\share

Reconnect at sign-in

Connect using different credentials

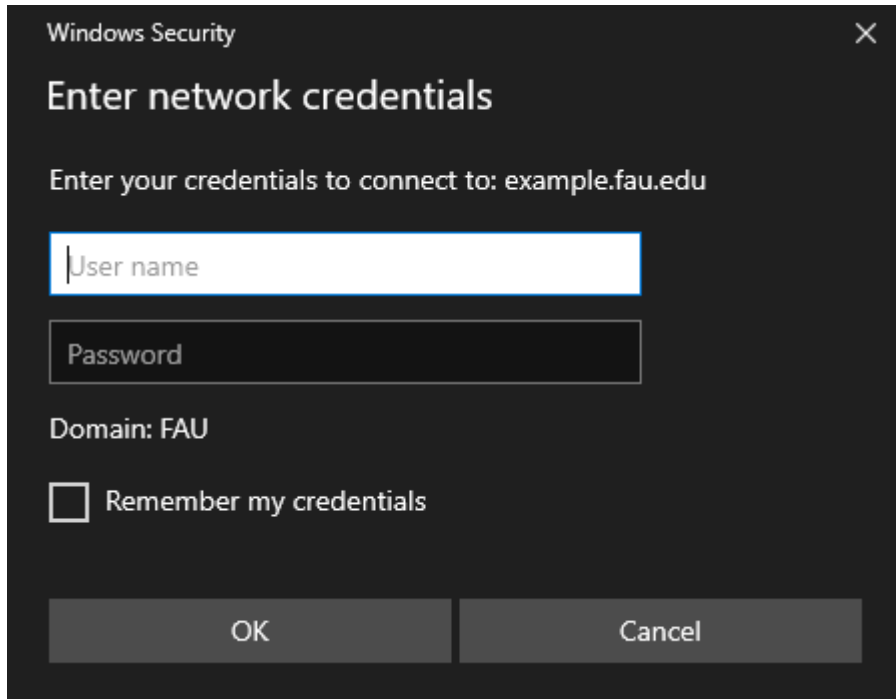

[Connect to a Web site that you can use to store your documents and pictures.](#)

Finish

Cancel

- If your shared drive requires special credentials other than your Windows login, please check the Connect using different credentials box and click Finish.
- If you specified different credentials, you will receive a popup box requesting you

input the credentials. If you wish to save the credentials so you aren't prompted to re-enter them every time your PC reboots, select the box next to Remember my credentials.

The image shows a Windows Security dialog box titled "Enter network credentials". The dialog is dark-themed with white text. At the top left, it says "Windows Security" and at the top right, there is a close button (X). The main title is "Enter network credentials". Below the title, it says "Enter your credentials to connect to: example.fau.edu". There are two input fields: "User name" and "Password". Below the input fields, it says "Domain: FAU". At the bottom, there is a checkbox labeled "Remember my credentials" which is currently unchecked. At the very bottom, there are two buttons: "OK" and "Cancel".
