Map network shared drive

Brian - 2023-03-03 - Network and Connectivity

To map a network shared drive, please follow the examples below:

• Open File Explorer then right click on This PC in the left panel and select Map

• Copy and Paste or type in the share location of the network drive you are mapping, remember to include the two \ symbols at the beginning of the name.

			\times
~	🤏 Map Net	work Drive	
	What net	work folder would you like to map?	
	Specify the o	drive letter for the connection and the folder that you want to connect to:	
	Drive:	V: ~	
	Folder:	\\example.fau.edu\share_name	
		Example: \\server\share	
		Reconnect at sign-in	
		Connect using different credentials	
		Connect to a Web site that you can use to store your documents and pictures.	

- If your shared drive requires special credentials other than your Windows login, please check the Connect using different credentials box and click Finish.
- If you specified different credentials, you will receive a popup box requesting you

input the credentials. If you wish to save the credentials so you aren't prompted to re-enter them every time your PC reboots, select the box next to Remember my credentials.
