Outlook: Quick Parts

Samantha Starr - 2025-08-05 - [Office/Windows Support](#)

Outlook: Quick Parts

Quick Parts is a feature in Outlook that allows you to create, store, and reuse pieces of content in your email.

1. **Compose Your Content:** Start by opening a **New Email** and type the text or insert the content (like images or tables) you want to save as a Quick Part.
2. **Select the Content:** Highlight the content you want to save.
3. Go to the **Insert** tab.
4. Click on **Quick Parts** in the Text group.
5. Select **Save Selection to Quick Part Gallery**.
6. **Name and Categorize:** In the dialog box that appears, give your Quick Part a name, choose a gallery (usually "Quick Parts"), and optionally, add a category and description.
7. **Save:** Click **OK** to save your Quick Part.

Now, whenever you want to use this Quick Part, you can go to the **Insert** tab, click on **Quick Parts** then **Autotext** , and select it from the gallery.
