Find Florida Atlantic University from the list of Organizations and click Continue

Next, Select Access through your institution.

Sign in

Then type in Florida Atlantic University in the Organization's name field and hit Continue

Access through your institution

You may sign into the ORCID Registry using institutional accounts you already have, like one from your university. If you don't already have an ORCID iD, you will be prompted to create one. Learn more about different ways to sign in to ORCID.

After finding your end point, transfer the files from your globus connector to Koko. If you do not have the Globus Connect client installed, there is a link on this search page to download it. You do not need to keep the webpage open once the transfer begins, the local client connectors will handle the transfer in the background. The PC on your side with the connector will need to stay on during this time though.
