Using SFax - [as a Printer]

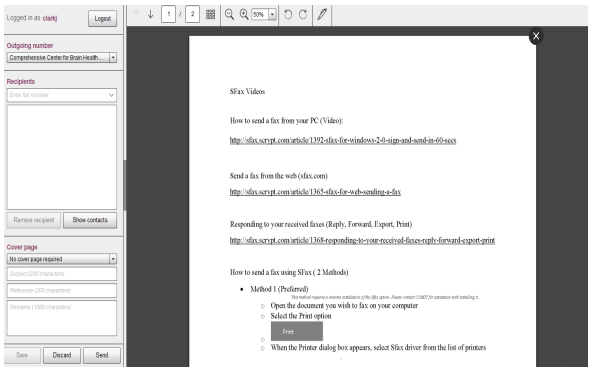

Jeff Clark - 2018-08-06 - Desktop Computing and Printing

How to send a fax using Sfax (Print Driver Method)

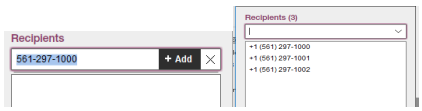

Prerequisite : This method requires and SFAX account and a onetime installation of the Sfax option. Please contact COMIT for assistance with creating your account and/or installing the software.

Step	Instruction	Prompt
1	Open the document you wish to fax on your computer . *(Can be an Office Document, picture, scan, pdf, etc.)*	
2	Select the Print option from the application	
3	When the Printer dialog box appears, select SFax driver from the list of printers (If prompted, click ACCEPT for Adobe Air)	
4	You will then be prompted with the SFax login screen. Please enter your FAU Username and your corresponding password for SFax	
5	Select CONTINUE	

6 You will then be brought into the SFax Sending Portal

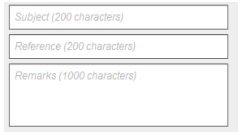

7 In the left column, Enter the phone number of the recipients (one or more), select +Add button after each number

8 In the left column, Select the **Florida Atlantic University** cover page

9 In the left column, Enter the Subject, Reference and remarks which will appear on the cover page. It's a good idea to add the recipient's name in the Reference field.

10 Select SEND
