Add/Remove FAU email account from Mac Mail

Removing Email accounts from Mac Mail

- If you are accessing your FAU email account through Mac Mail and are experiencing login issues here are the steps to resolve it.
- First thing you want to check is the version of Mac OS that your MacBook is currently running, as it has to be on 10.14 or later. You can check by clicking on the Apple Icon on the top left corner of the screen and hit "About This Mac" and it will pull up the version info you currently have

 Now you would want to have the Mac Mail open and select the "Mail" tab which is on the top left corner of the screen right next to the Apple icon, and select "Preferences".

• Once that window is open, on the left hand side select your FAU Exchange account
