COM Approved AI Tools

FAU has agreements in place with the AI tools below. Ensure you are signed in with your FAU credentials to the tools below before use.

Note: AI should be used as a productivity aid, not as a substitute for critical thinking, professional judgment, or verification of academic, clinical, or research information. Always review AI-generated content for accuracy and appropriateness.

Microsoft Copilot (Data Classification Levels 2-4)

- AI assistance features that are built in to Microsoft 365 Applications. Suitable for work assistance with organization-specific files.
