Foundations of Medicine 1 (FOM1)

Course Description: The Foundations of Medicine (FOM) course provides students with an understanding of the fundamental principles necessary to become a competent, compassionate and professional physician with opportunities for direct patient care. FOM is divided into four courses: FOM 1, 2, 3 and 4, which will run throughout the first two years of medical school. This separation is designed to provide a summative assessment to students at the end of each FOM course.

Course Goals: The goals of the FOM 1 course are to assist students in developing the knowledge, skills, attitudes and behaviors that are needed to: 1) interview and examine patients; 2) answer clinical questions; 3) understand the importance of patient advocacy and disease prevention; 4) explore the barriers to healthcare and instill the foundation for the ethical and legal framework of patient care; and 5) integrate the knowledge of basic science, clinical skills and the science of clinical practice components. The course also introduces the skills needed to provide care to specific vulnerable populations and learn the basic tenets of working in interprofessional teams.

4. 
5. Select the exam name that you will be grading.
6. Select the student name to grade the student's responses
