iClicker Groups Student Guide

1. Once your instructor assigns you to a group, information about your group will appear on your course overview screen.
2. Click the **Group Members** link to view the names of your group members.

3. You will also receive an in-app notification in the course notification center whenever you are assigned

to a new group.

4. When your instructor starts polling, the question image and answer choices will appear on your screen.
5. With a group poll, you also see a results chart that shows how everyone in your group is voting.
6. You can change your answer while polling is open and the chart updates in real time.

Question 1

Group Question: Multiple Choice

What effect do condensation and rainfall have on atmospheric humidity?

- A. No significant effect on atmospheric humidity
- B. They lower atmospheric humidity
- C. Both increase & lower atmospheric humidity
- D. They increase atmospheric humidity
- E. Atmospheric humidity does not exist

Individual Answer

Submit your answer to view your group members' responses.

Select an Answer

- A
- B
- C
- D
- E

7. Discuss the question with your group to agree on the best answer and achieve consensus.
8. Your group's response is automatically submitted once all group members respond with the same

Question 1

Group Question: Multiple Choice

What effect do condensation and rainfall have on atmospheric humidity?

- A. No significant effect on atmospheric humidity
- B. They lower atmospheric humidity
- C. Both increase & lower atmospheric humidity
- D. They increase atmospheric humidity
- E. Atmospheric humidity does not exist

Group Answer

Consensus Reached!

Your instructor will end the poll soon.

Group Answer Received

A

answer.

9. If polling ends and consensus is not reached, your group vote will still be submitted if there is a majority vote with a single response receiving more than 50% of your group's votes.

Group Question: Multiple Choice

What effect do condensation and rainfall have on atmospheric humidity?

- A. No significant effect on atmospheric humidity
- B. They lower atmospheric humidity
- C. Both increase & lower atmospheric humidity
- D. They increase atmospheric humidity
- E. Atmospheric humidity does not exist

Group Answer:

B

Majority Vote

Your group answer was submitted based on the majority of votes.

Group Result All Result

10. If neither consensus nor a majority vote is reached, no response is submitted for your group. No matter how you vote as an individual, all group members share the group's vote as their final answer, including a **No Response** answer if consensus or majority vote isn't reached.

What effect do condensation and rainfall have on atmospheric humidity?

- A. No significant effect on atmospheric humidity
- B. They lower atmospheric humidity
- C. Both increase & lower atmospheric humidity
- D. They increase atmospheric humidity
- E. Atmospheric humidity does not exist

Group Answer

No Response

Unable to Reach Consensus

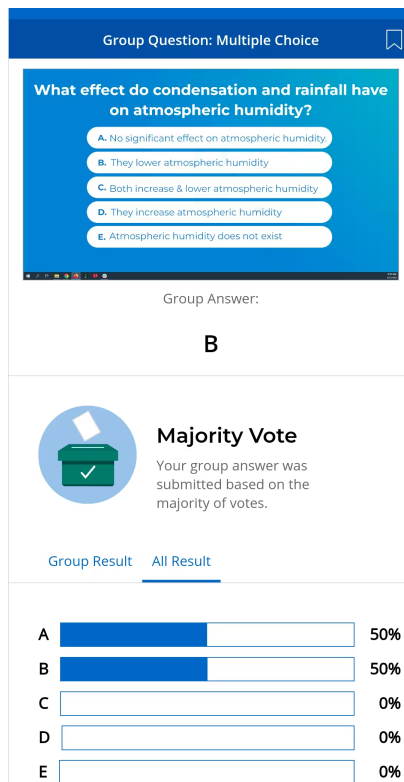

Your instructor has ended the poll. Your group did not reach consensus, so no answer was submitted.

Group Result All Result

Option	Percentage
A	0%
B	33%
C	33%
D	0%
E	0%

2/3 group members responded to this question.

11. If you'd like to compare how your group voted with other groups in the class, toggle to the **All Result**

tab after polling has ended.

Group Polling Scores Example

Working in a group means that the group's submitted response is the response that gets recorded as your response, even if you voted differently within your group. If your instructor grades the group poll and awards points for correctness, your group's response determines whether or not you will earn those points. If your instructor awards points just for responding, you'll still earn those points based on your individual response rather than the group response.

The following table shows some scoring examples using a group of four students. Depending on how you and the other three students answer, this is how you would score on each question:

	Example Question 1	Example Question 2	Example Question 3	Example Question 4	Example Question 5	Example Question 6	Example Question 7
Correct answer	A	A	A	A	A	A	A
Your answer	A	A	B	A	A	No Response	No Response
The rest of the group's answers	A, A, A (Consensus)	A, A, B (Majority Vote)	A, A, A	B, B, B	A, B, B	A, A, A	A, A, B
Group response	A	A	A	B	No Response	A	No Response
Do you get credit for the correct response?	Yes	Yes	Yes (You answered incorrectly but your group answered correctly by majority vote)	No (You answered correctly but your group answered incorrectly by majority vote)	No (You answered correctly but your group did not reach a majority vote)	Yes (You didn't answer but your group reached the correct answer by majority vote)	No (You didn't answer and your group did not reach a majority vote)
Do you get credit for responding (participation)?	Yes	Yes	Yes	Yes	Yes	No	No
