OwlMed: M4 Lottery Filters

Christine Clevenger - 2025-02-10 - [OwlMed and Canvas](#)
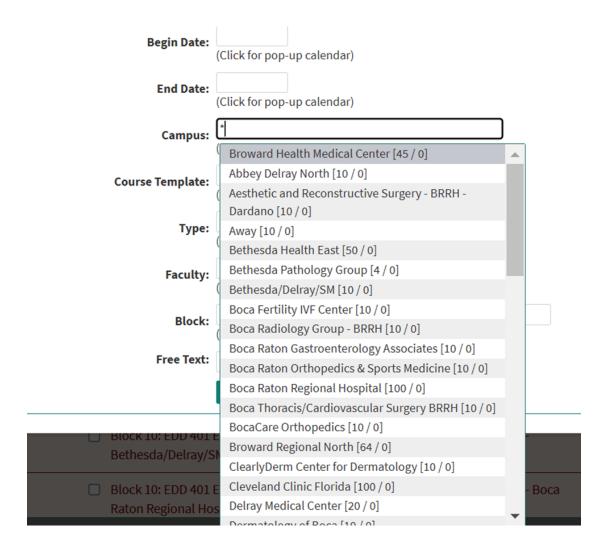

M4 Lottery Filter Instructions

The M4 Lottery is a complex process that includes over **2,000** rotation options in total. Filters can be a useful tool to help guide your rankings.

KEY POINTS:

- **Allow 5-10 seconds for a filter to load prior to selecting a second filter.**

- You may layer filters, but remember filters are "sticky" and must be reset if you are changing parameters.

- You may filter by the following (screenshots to follow):

    1. Campus (wait 5-10 seconds) = available locations

    2. Course Template (wait 5-10 seconds) = available Course #s

    3. Faculty (wait 5-10 seconds) = Primary Physician or contact

    4. Block (wait 5-10 seconds) = 4 week blocks during Lottery 3 or 2 week blocks during Lottery 4

    5. Free Text = type in key words. Quotation marks can be useful.

Example Filters:

1) CAMPUS FILTER

- **Allow 5-10 seconds for a filter to load prior to selecting a second filter.**
