OwlMed: Patient Encounter Tracking (Student)

Marcelle Gornitsky - 2025-07-31 - OwlMed and Canvas

Patient Encounter Tracking Tutorial for Students

For information about reviewing your submitted entries, please skip to approximately 2:07.

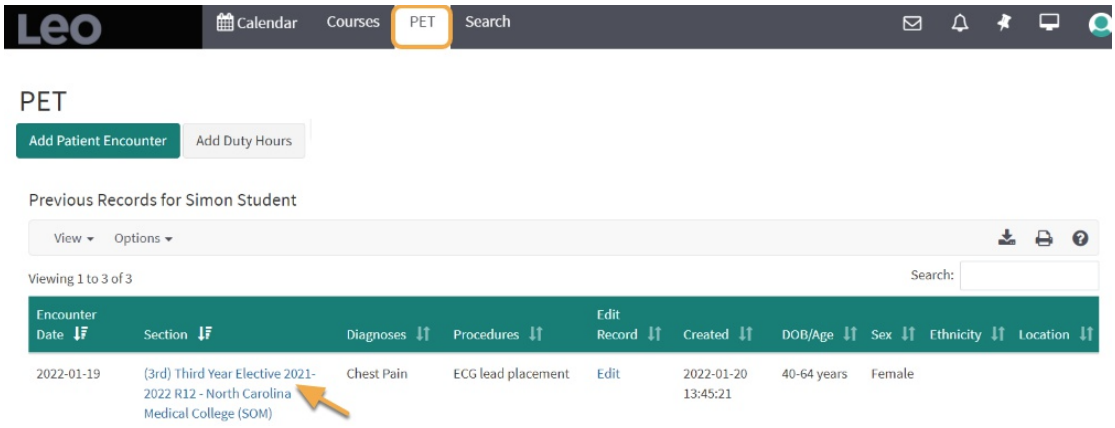

The **Patient Encounter Tracking (PET)** is a tool for Students to log their clinical encounters with patients.

- Students are able to enter basic information about their patient, procedures that were done during the encounter, observed patient conditions, duty hours, etc.
- The data fields are configurable by the institution.
- The instructor is then able to collect the student **PET** entries and use them for grading purposes.

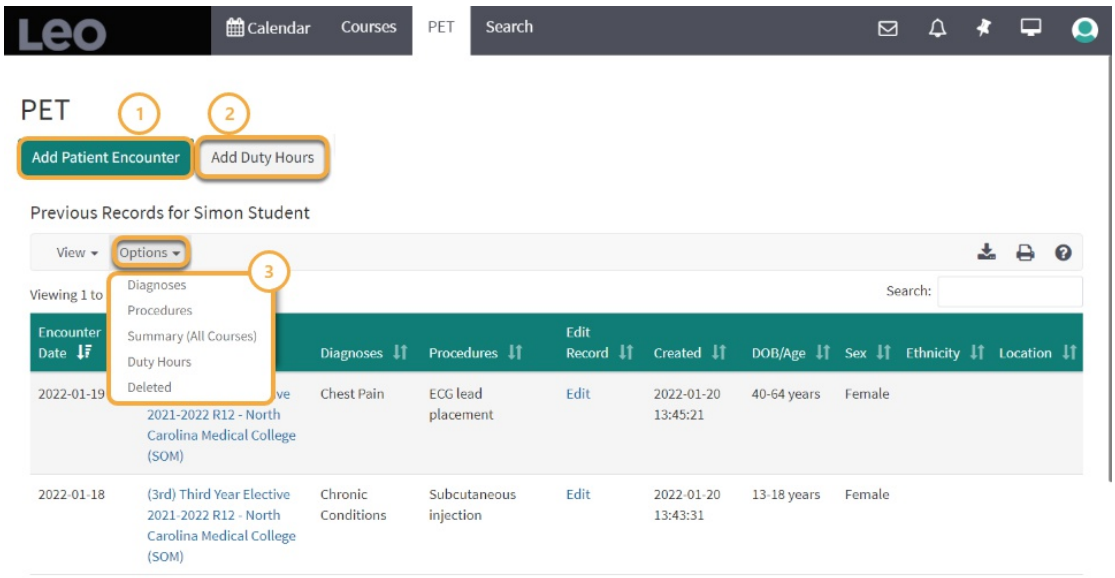

Student Access of PET Tab

Students can access the PET from the home screen or landing page.

Existing PET entries will be displayed in a list. Select the Section link to navigate directly to the Section in which the record is associated.

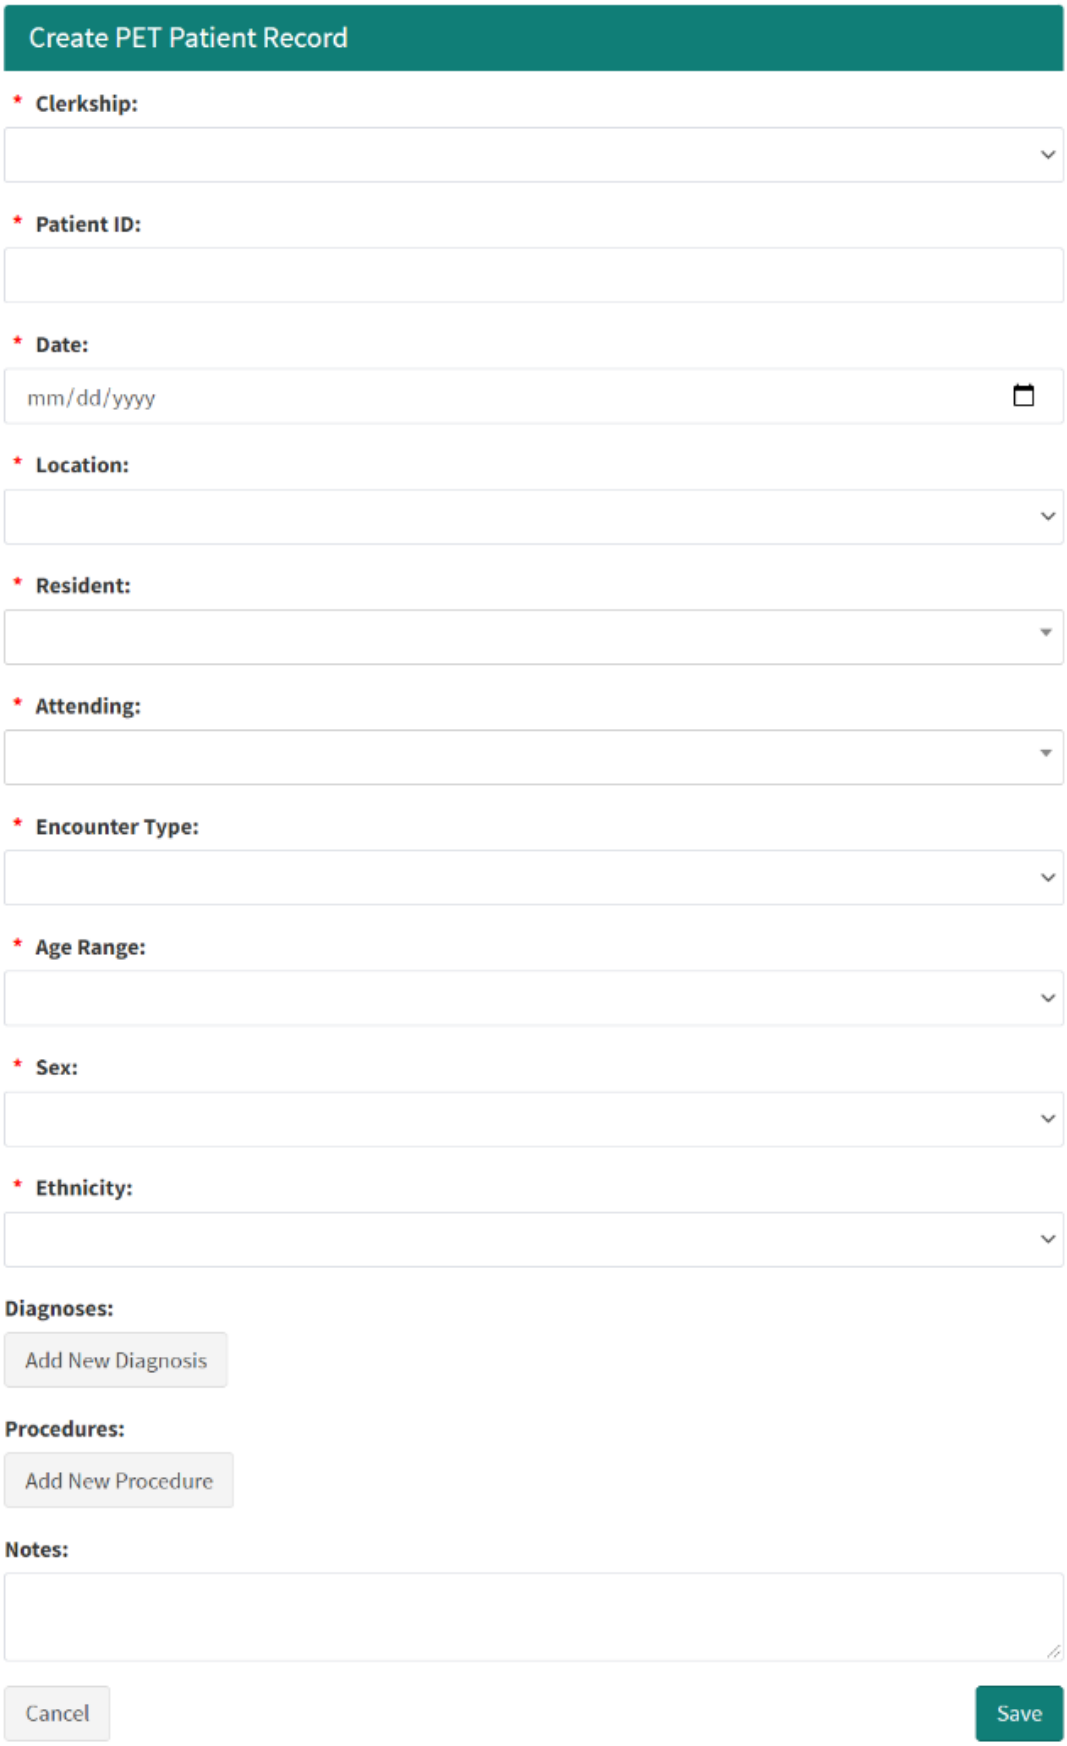

PET Screen Menu

The PET Manager allows students to do the following:

1. Enter a New Patient Encounter
2. Record Duty Hours
3. Filter results by selecting **Diagnoses**, **Procedures**, **Summary (All Courses)**, **Duty Hours** or **Deleted** from the **Options** menu.

New Patient Record

Fields marked with an asterisk (*) are required when entering PET records at your institution.

NOTE: Required fields are determined by each institution and may vary.

Editing a PET record

Edit PET Patient Record

* **Clerkship:**

(3rd) Third Year Elective 2021-2022 R12 - North Carolina Medical College (SOM)

* **Patient ID:**

POD789345

* **Date:**

01/19/2022

* **Location:**

Westchester Medical Center

* **Encounter Type:**

Consult

* **Age Range:**

40-64 years

* **Sex:**

Female

Diagnoses:

Chest Pain, Participation: Simulated Patient

Click to edit or delete Diagnosis

Add New Diagnosis

Procedures:

ECG lead placement, Participation: Simul
