SPSS

Jeff Clark - 2021-07-09 - Software

SPSS is available via FAU Virtual Apps

<http://www.fau.edu/oit/virtual-apps/>

Virtual Apps: Software Anywhere Anytime

Students, faculty, and staff can get secure instant access 24/7, on-demand, to a library of popular software from any device, including smartphones, tablets, PCs and Macs anywhere in the world with an Internet connection. Virtual Apps allows people with a FAU username/password to login to a Web-based system to access these software packages.

This access gives FAU students, faculty, and staff the flexibility of using the software on campus, at home, or even while studying abroad.

Before you access this environment, you will need to install (only once) the [Citrix Workspace client](#) on your device. Once you install it, you can login using the [Virtual Apps Web site](#). For detailed instructions, please follow the instructions below.

General Information & Instructions

Please be aware that due to the fact that your Virtual Apps program is running on a personal server session, you must save your work locally or risk losing all your data. Saving files on the server is done at your own risk. FAU Office of Information Technology will not be held responsible for any lost files or work. Student M Drives currently have 1 GB of storage space. While in Virtual Apps, you are automatically mapped to campus print servers (fau.edu/print). The printer name is " **fauprintbw** ".

Installation Instructions & Guides

- Choose your OS for Installation Instructions:

- [Windows OS](#)
- [Mac OS](#)
- [Mobile](#)
- [Linux](#)
- [How To Use Virtual Apps](#)
- [How To Save Your Work](#)
- [How To Save Your Work In SPSS](#)

Note: You will need [Adobe Acrobat Reader](#) to read any of the PDF files. below.

Available Software Applications

- ArcCatalog
- ArcGlobe 10
- ArcMap 10
